About

With over 18 years of diverse experience in the high-tech industry, I am a seasoned executive known for driving innovation across data center energy solutions, AI infrastructure development, powered land initiatives, and IT management. My expertise extends to fostering strong customer relationships, government relations, and delivering cutting-edge technology solutions.

I am passionate about energy solutions for data computing and advancing technology. As a goal-driven strategic leader, I have successfully taken multiple products from concept to market, ensuring profitable monetization and sustained growth.

Experience

Co-Founder
Amp Z · Full-time
Jan 2024 - Present · 1 yr 9 mos
Miami, Florida, United States

As EVP and Head of Development at Amp Z, I oversaw the acquisition and development of powered land for data center projects, including land prep, utilities, and fiber infrastructure. I led a team of engineers, PEs, and construction leads to ensure build requirements were met. The role also included managing government relations, community engagement, and partnerships with landowners, including greenhouse operations and behind-the-meter natural gas generation.
